

On the left is an example of all three fields of the "Add Task" window entered with proper syntax and on the right is how the task appears in the "Pending Tasks" list after the "Add Task" button in the "Add Task" window has been clicked.

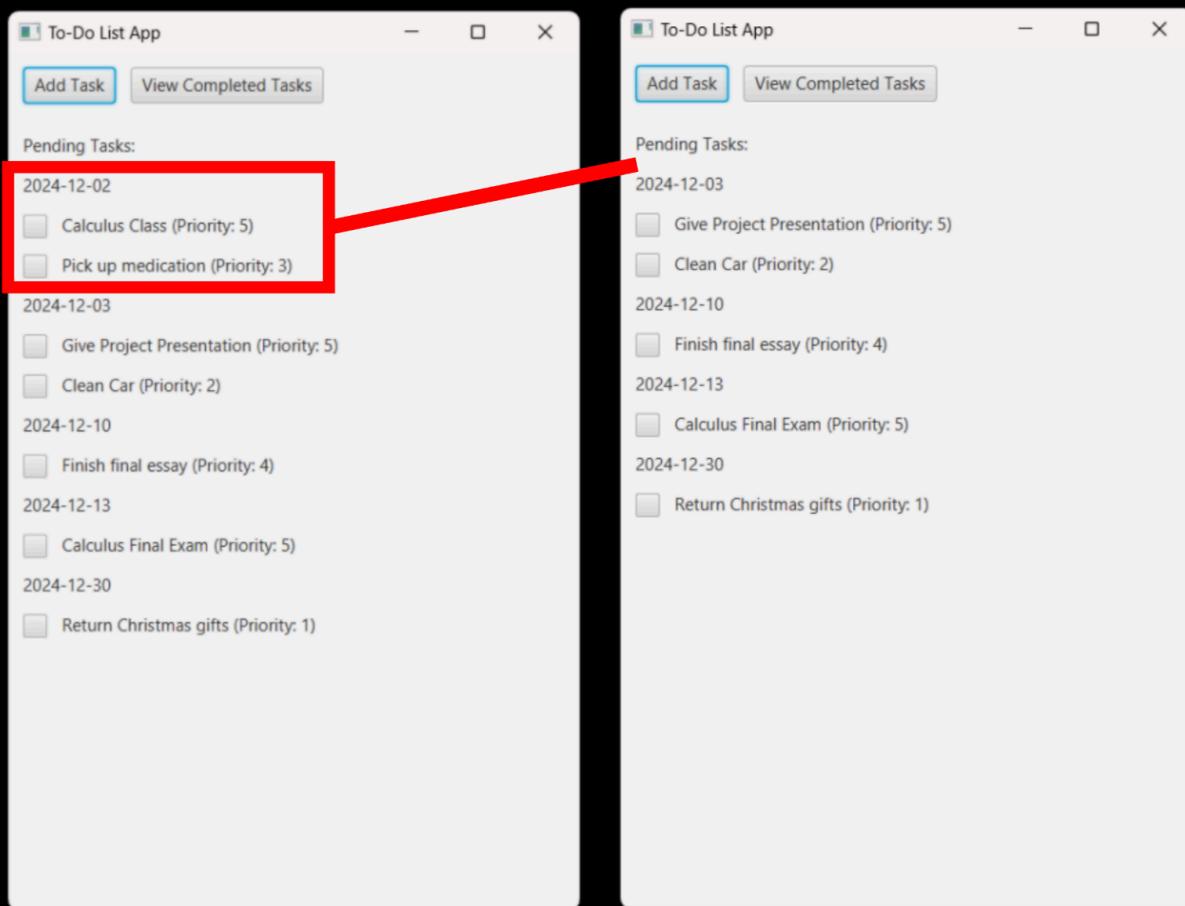

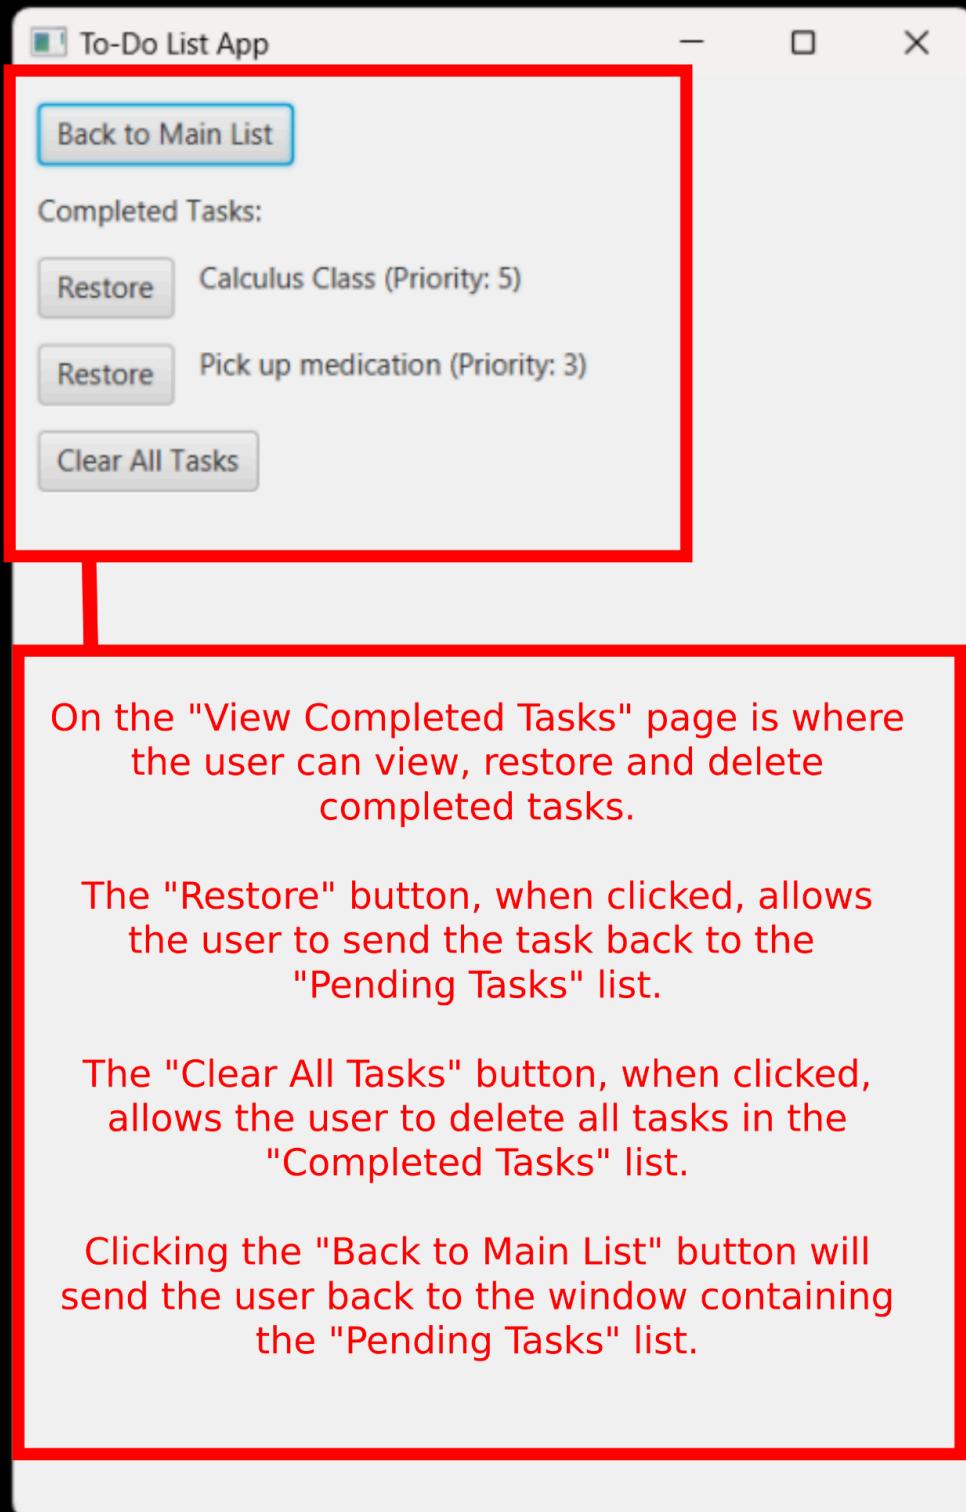

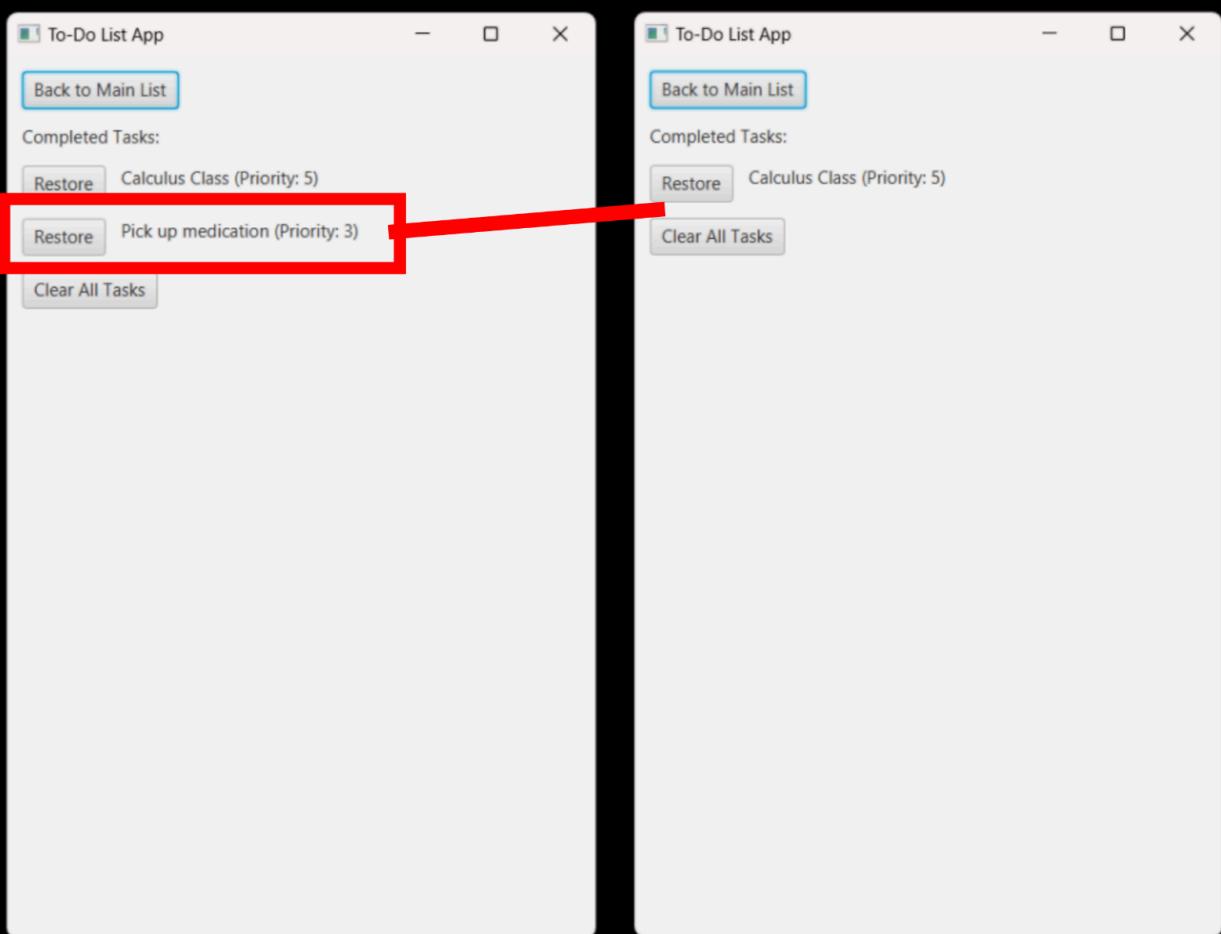

**Below is an example of the "Pending Tasks" list before and after the two tasks from 2024-12-02 had been marked completed by checking the box to the left of the tasks.**

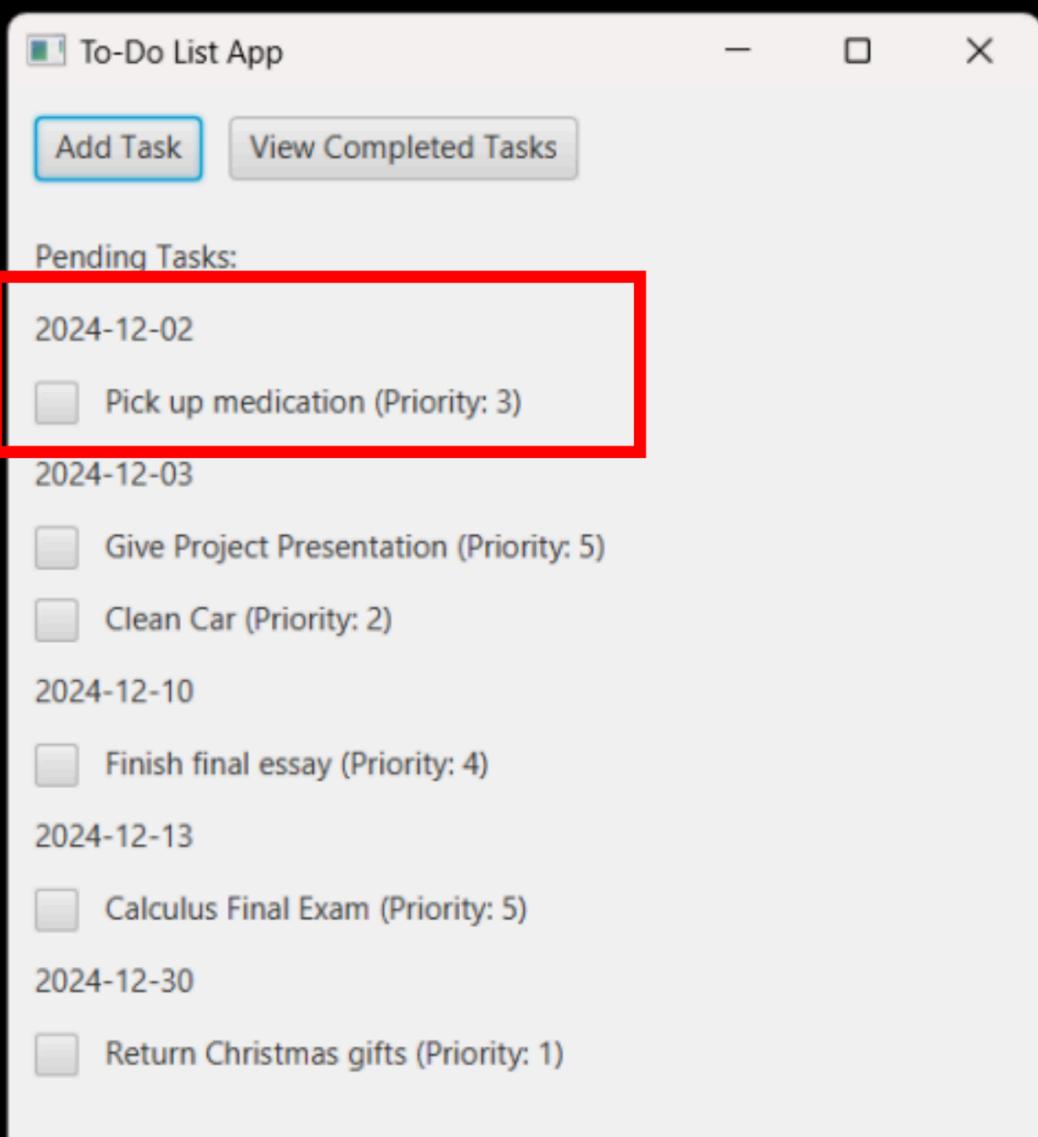

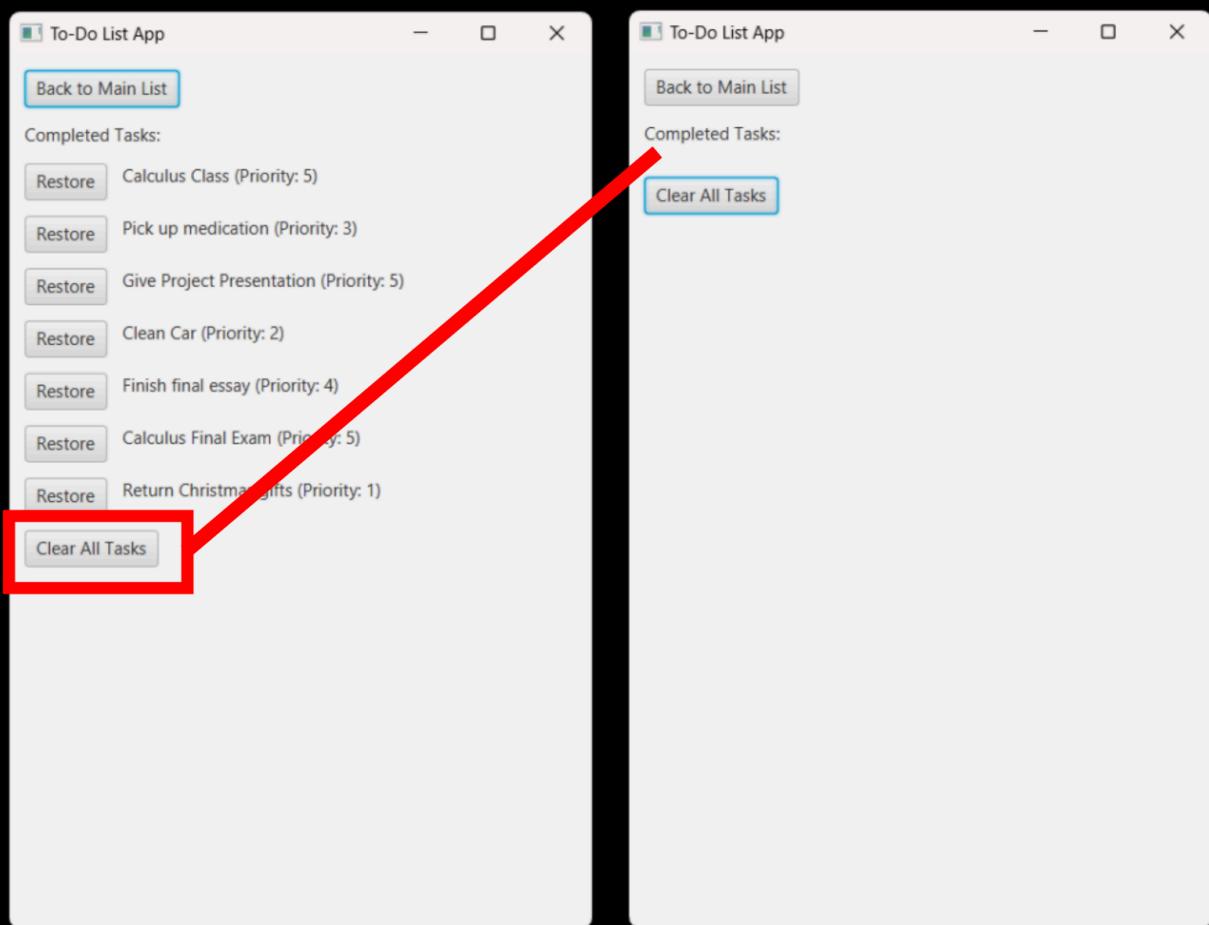

Below is an example of before and after the user clicks the "Restore" button on a completed task.  
Once the user clicks the "Restore" button, that task is removed from the "Completed Tasks" list.

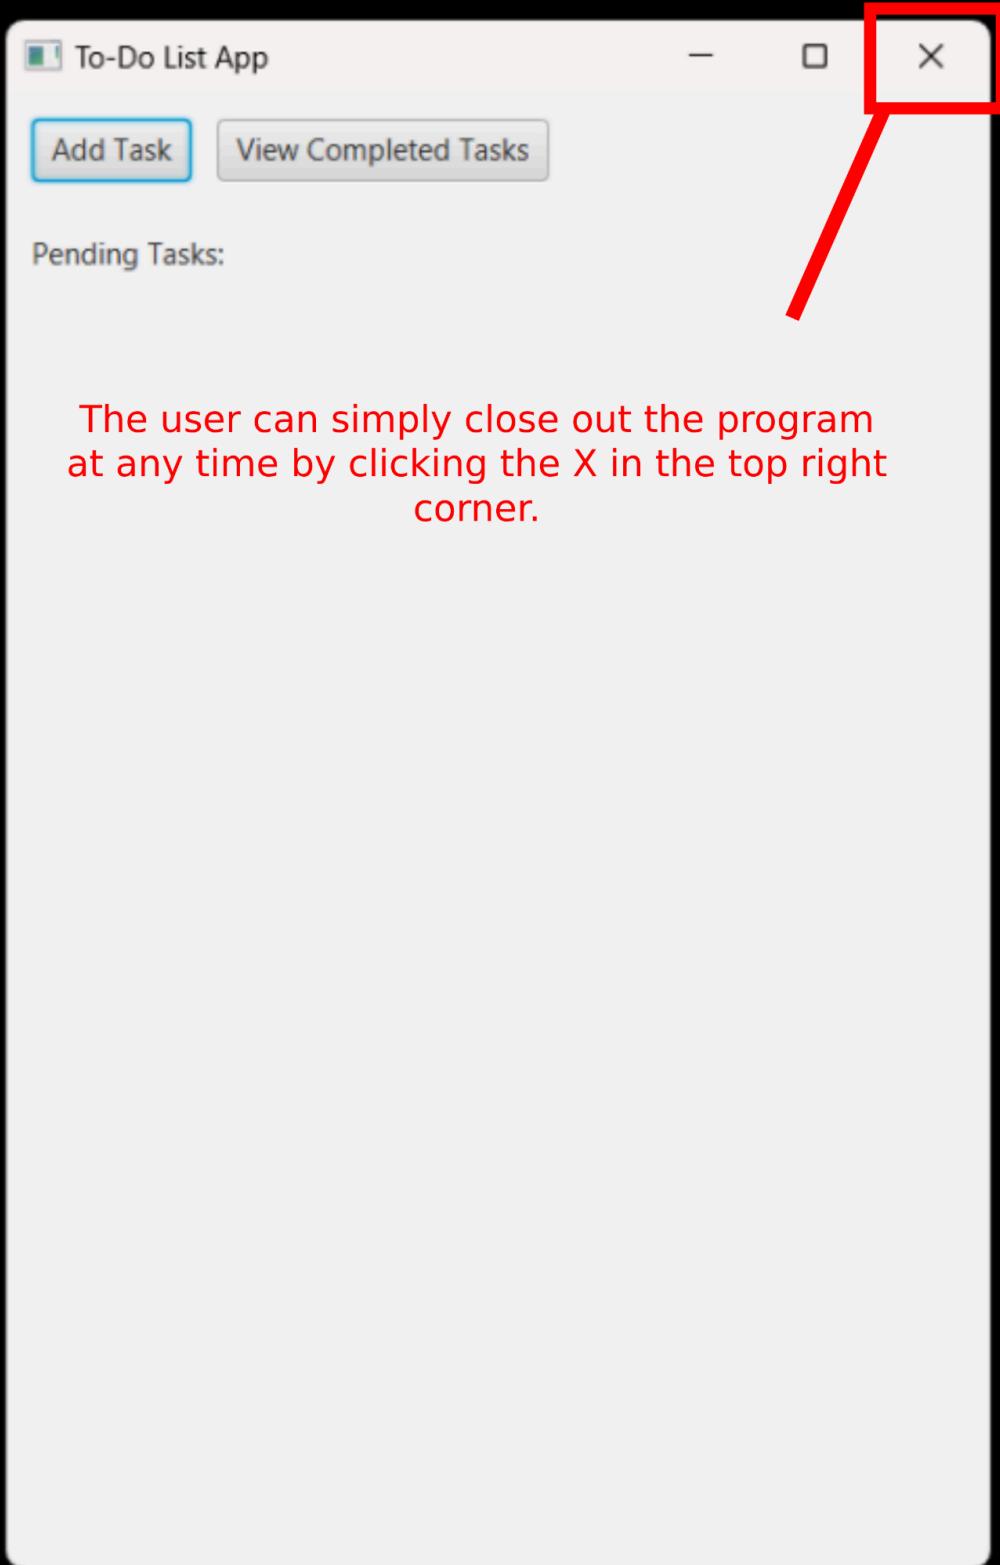

Below is a continuation of the previous example, showing that once the task's "Restore" button is clicked, the task returns to the "Pending Tasks" list. The task will appear the same as it did before it was marked complete.

Lastly, is an example of what happens when the user clicks the "Clear All Tasks" button. Regardless of how many tasks are in the "Completed Tasks" list, they will all be deleted from the list, unable to be recovered.

The user can simply close out the program at any time by clicking the X in the top right corner.
